HDMSe00450857

FSDF STATUS / ACTION ITEMS

week 29. Received Tracers from S. Tanz. She didn't know the contract was extended to the end of FY - let alone additional funding! Now need to find out from Bly or Murphy re: Invoices.
7/14. Left msges for Murphy & Bly on the tracers. I was trying to get hold of Fergus to return all the bids I have for Excavation. 7/15. Shoji called to let me know that Fergus is on vacation. 7/16. Gave updated but simplified schedule to Horton for Show & Tell.
week 31. I was supposed to get Majelle's signature on the tracers, and get SOW for additional work for Murphy/Hatten.

ORISE work
see previous status reports

McLaren Hart's Offsite work
see previous status reports
Now comments expected along with HBRA comments - in May or June.

ICF's Sampling/Analysis work for FSDF
Inculdes HBRA
See previous reports
see previous reports

.

5/9 or 5/10. Lopez e-mailed to Majelle directing us to proceed with HBRA (without delay?).
5/20. Faxed WAS to Ruth authorizing to proceed with HBRA.
6/26-28. Environmental collected Weir samples, were sent to ICF.
Showed FSDF area to Ravnesh, briefed him on latest.
9/6-20. ICF came by. Went over risk levels and corresponding excavation areas. Ruth has a few action items.
9/23. Sullivan says Chandler asked for the old Ebasco Work plan. Then if we show him what we plan to excavate, backfill etc. he will give us permission in writing (of the excavation only). Mike will write a letter.
No letters to DTSC have gone out yer.
Week 41. ICF is reestimating areas and volumes with chemical concentraiions of concern
11/12. Sullivan says he just has a few pages to read/correct and then HBRA final will be ready.
11/15. Mike says TR Hathaway has promised him that if he gets HBRA & old work plan by Monday, 11/18, he will meet with Mike on 11/25 and decide on carrying on with Excavation.
Week 48. Mike met his commitment, but mtg for 11/25 was canceled because Chandler injured his back.
week 51. No news from DTSC yet.
Week 8. Still waiting for DTSC comments
Week 9. Some progress seems to have been made. Debra Oditz, DOE Sacramento, has said that comments are being sent to LA office. Then will have a meeting to iron out

FSDF STATUS / ACTION ITEMS

Additional Consultation Contracts

5/1/97. Mukherjee sent an urgent e-mail asking about the status of contract with independent consultants. Turns out he had talked about these to Loren and, he says, me. He thinks I have even seen the SOW's. I did not remember, but Ravnesh had SOW's. So immediately I started 3 EASY docs: 1. Dr McWhorter for chlorinated solvent transport, 2. Dr. Parker, for matrix diffusion of solvent in fractures, 3. Dr. Cherry, for modeling assessment.
week 20. Manida can't approve the EASY's because of lack of funds. Neil anxious.
week 21. It is decided to change wordings in the Easy to allow for incremental funding - Manida says she still will not be able to approve until there is money.
week 24. Ravmesh decided to use open account for the contracts, and release only 30,000 this FY (he will use the appropriate charges when the bills come). Manida will take care of this.
week 25 or 26. The open account is in with the related changes regarding limited fund release. The Easy's are in Purchasing Q.
week 27. e-mailed SOWs to Hatten (on vacation) & copy to Steele.
week 29. Joannie says these being consulting contracts, we have to fill out a couple of more forms - she had sent a copy to Neil. Neil gave me copy to fill out. Other form has to be filled out by consultants - who are taking their time. We need to fill out our forms and then wait for consultants to fill out theirs.
7/16. Talked to Neil. He gave me samples of filled in forms - these are reqts of Boeing - for consultants. Need to fill these in. He will find out if the Consultant Application forms that he will get from the same contractors for his projects can be used for the FSDF project also. 7/17-18. Got electronic forms from Joannie (these forms not yet available on network). Need more info from Neil. Need Hortons signature.
week 31. Horton wanted to check with Majelle on whether this will constitute "advice to Govt etc." Majelle decided no. Put 3 requests & 2 Consultant

BNA04366906

HDMSe00450859

FSDF STATUS / ACTION ITEMS

	Applications in company mail for Joannie. Mail did not get picked up for 3 days (Mon-Wed). Was able to add third Application on Tuesday. Presumably Joannie got them on Friday.
Class Action Suit	Week 17. For information only now. Gaylord has Sharon setting up a full library to support us in the suit. 5/22. There is a meeting called by the lawyers in the suit on 5/29. week 23. News reports say we have settled with BBI. The meeting on 29th though was all about more suits (or more persons in the class action).

for review. I sent my comments to Sullivan.
4/28. Tuttle wanted to know about tarp removal because Rutherford is trying to get DHS to come and release FSDF once and for all. I told Tuttle we were going to wait till June to remove tarp, but we could do it early if Rutherford wanted us to remove it for DHS
week20 (5/9). Received email from Sullivan - no formal reply from DTSC yet. DTSC to visit SSFL on 5/22 & 23. Final comments promised by 5/30.
week 21. Preparing for DTSC visit. Asked Plant Svcs to look at weed removal to make channels accessible. Also Hardy for removal of scrap from excavated buried objects.
5/21. Weeds are gone. So is the scrap.(Richard Alexander of Plant Svcs is coordinator, Alice Acuna & Dominique did the work)
5/22. Obtained TR Hathaway letter from Sullivan. He agrees with us on just about everything - needs a little more explanation on PCD, dioxins. May be we have a chance.
5/23. DTSC was here but I did not see them
week 23. Failed to contact Mike to find out the results of DTSC visit and meaning of TR letter.
week 24. A conference call with ICF Kaiser is scheduled to plan the response to the request expected from DTSC for ecological information.
week 25. Got comments from Ecological personnel of DTSC. They do want more info. A response is being drafted by Sullivan.
week 26. Sullivan sent response to TR.
week28 & 29. Sullivan on vacation. No news on HBRA.
week30. Mike back from vacation. He wants to discuss further plan of action. Mike has prepared notes on Eco requirements for DTSC - look like a lot of work for ICF. ICF will presumably bid on this.

BNA04366911

HDMSe00450864

FSDF STATUS / ACTION ITEMS

	week 30 1997. At this point, there is only one, double containment black, tank remains at the pond (along with the 2 damaged ones) which belongs to Enviro. Mark was afraid we might be paying for it. Sujata thinks Enviro probably does not even know about it.
Electric pole with two cuts by the pond	see previous status reports 10/16. Mike says this pole is in the middle of channel B and may have to be removed for excavation.
Geophysical & Hydrologic Testing of Area IV	See previous status reports
Mike Lopez wanted to know max conc. in 886 (2/13/96)	see previous status reports
Mike Lopez reviewed schedule, costs	see previous status reports
Groundwater Remediation Wells RD-21 & RS-54	Week 6 thru 17 removed in week 19, 1997. (it contained how the contract was placed and how things worked in the begining). week 18. All questionable piping now replaced with metal, underground. Bad elbow replaced with metal piping. System working fine. RMHF well monitoring reports from GRC (Jan, Feb, Mar) DTR'd. I seem to have completed my first WAS for this work. Need to send it to Dickens. week 19. WAS was given to Lyn. GRC still has no phone! Lyn was going to leave keys in my desk, but didn't. Everything is working fine at the wells. Solar panel withstood winds last time, so no worry now week 21. Asked Neil about removing old drums. He is talking to GRC. 5/21. Old drums are gone. Neil says he has mentioned panel areas getting very dirty to Lyn. I guess GRC will clean up. week 22 & 23. Monthly from GRC arrived. Prepared DTR. week24,25. Got the first monthly from GRC. DTR'd (Not signed by Majelle so not really released) week 28. Received monthly on B/886 wells. DTR'd.
Additional Consultation Contracts	5/1/97. Mukherjee sent an urgent e-mail asking about the status of contract with independent consultants. Turns out he had talked about these to Loren and, he says, me. He thinks I have even seen the SOW's.

FSDF STATUS / ACTION ITEMS

WEEK 28 (Jul 28 - Jul 3 (&4), 97)

Note: Took July 3 off - worked 3 days this week.

ITEM	STATUS
contract amounts and status of FSDF work	removed in week 19, 1997. Week 2-6 A revised cost estimate along with the schedule was given to Moore. However, stay tuned for further revision Week 9. "Excavation" contract with ICF is being held up due to legalease. Minor points shall be taken care of soon, but there were a couple of items included in last contract which are not in this one and vice versa. Next week, may be? 2/27. Ruth says now ball in Fergus's court! week 13. Still contract not signed. Fergus says mere formality remains (Higher ups at Purchasing & RD have to sign) Week 16. Contract still not signed as far as I Know Week 17. Contract still not signed! week 18. Carrell still has not signed the contract yet. Need to get Majelle or even Gabler involved. week 20. 5/5. Carrell says he looked at contract and because of the changes made due to ICF request, we may have to send the contract back to DOE for approval - or send it back to ICF and get rid of changes. I said some of the changes requested by ICF were quite reasonable. He said he will look into it! week 21. Fergus says that he sent the contract back to ICF to ask them to sign the contract with original terms (the schedule was not a problem). 5/23. Fergus said that issues have been resolved & he has faxed our signed contract to ICF. I take it to mean that the contract has been placed. Trying to add money to ICF existing for additional work resulting from DTSC intrancigence. Hartmann did not return calls. I think I need to just revise Easy & modify(?) scope of work. week 23. Hartmann says if there is no change in scope then a revision of Easy will do it. But if we are adding a task or making material changes to SOW then would need to have noncompetitive justification. Gave copy of additional cost from ICF to Mike for his review although he says Custance is pretty st. forward about charges. week 24 & 25. Ruth indicated she will be leaving ICF. A meeting was scheduled for 6/5, but I think was cancelled. No action on the more work till Ecological info work is scoped (even more money). Week 27. Ruth is with Dames & Moore, Santa Barbara. Will meet with us in next two weeks. We decided that I should add money in current contract for the extra work. and have a new easy req. for ecological risks after we get estimate on that. *week 28. Initiated Easy to add $33,000 to contract to cover work required due to DTSC.*

BNA04366916

HDMSe00450869

	RMHF well monitoring reports from GRC (Jan, Feb, Mar) DTR'd. I seem to have completed my first WAS for this work. Need to send it to Dickens. week 19. WAS was given to Lyn. GRC still has no phone! Lyn was going to leave keys in my desk, but didn't. Everything is working fine at the wells. Solar panel withstood winds last time, so no worry now week 21. Asked Neil about removing old drums. He is talking to GRC. 5/21. Old drums are gone. Neil says he has mentioned panel areas getting very dirty to Lyn. I guess GRC will clean up. week 22 & 23. Monthly from GRC arrived. Prepared DTR. week24,25. Got the first monthly from GRC. DTR'd (Not signed by Majelle so not really released) *week 28. Received monthly on B/886 wells. DTR'd.*
Additional Consultation Contracts	5/1/97. Mukherjee sent an urgent e-mail asking about the status of contract with independent consultants. Turns out he had talked about these to Loren and, he says, me. He thinks I have even seen the SOW's. I did not remember, but Ravnesh had SOW's. So immediately I started 3 EASY docs: 1. Dr McWhorter for chlorinated solvent transport, 2. Dr. Parker, for matrix diffusion of solvent in fractures, 3. Dr. Cherry, for modeling assessment. week 20. Manida can't approve the EASY's because of lack of funds. Neil anxious. week 21. It is decided to change wordings in the Easy to allow for incremental funding - Manida says she still will not be able to approve until there is money. week 24. Ravmesh decided to use open account for the contracts, and release only 30,000 this FY (he will use the appropriate charges when the bills come). Manida will take care of this. week 25 or 26. The open account is in with the related changes regarding limited fund
